TANKWA KAROO

A 2 DAY CAPE TOWN TOUR

This overnight tour will take us to the arid plains of the Tankwa Karoo. It offers a host of birds not found in the usual habitat surrounding Cape Town, as well as a number of localised endemics. This includes the beautiful Cinnamon-breasted Warbler and the difficult to find Karoo Eremomela. Karoo specials are numerous and handsome endemics such as the Rufous-eared Warbler and Black-headed Canary will be searched for. The minute Fairy Flycatcher is a favourite as is the highly secretive Karoo Korhaan. This region often holds some unexpected species and there are opportunities for nomadic birds such as Burchell's Coursers and Ludwig's Bustards.

Join us on this popular tour from Cape Town!

TOP ENDEMIC

Cinnamon-breasted Warbler
